

## ANNUAL REPORT

**Name of Regional Network: North London Clinical Audit Network [NLCAN]**

**Regional Network Chair: Sairatha Nimalathevan**

North London Clinical Audit Network is committed to raising its profile of clinical audit and Quality within the North London Region. This report summarises the activity undertaken in 2014/2015.

### Successes and lessons learnt

- NLCAN has been a platform for many Clinical audit and Quality improvement professionals. In addition, it has also provided an opportunity for the local and National partners to share their service profile which has created a supportive educational resource for our North London Region.
- In 2014/2015, we had various National speakers attend the meetings to share/provide information on national initiatives/ national audit findings and this has been a great resource for the network. Network has played a positive role by enabling healthcare professionals to network [including online] and to build a strong professional relationship with the wider community. Attendance from National bodies, such as HQIP and NICE has certainly strengthened the network,
- NLCAN continues to thank UCLH [250 Euston Road, London] for hosting the quarterly meetings and providing the network with the required equipments and visual aids. The meetings are held at this permanent location as it is central for all members attending the meeting.

### Future Direction

In 2015/2016: NLCAN aims to develop various voluntary roles within the network as this will continue to support with NQICAN's strategy and a great opportunity for the members to be more involved with the network.

NLCAN seeks to receive updates from NICE and HQIP on a quarterly basis

Members attending NLCAN represent their Health care organisation, in the recent meetings, the network has noted that the maintenance of an up-to-date membership list/register has proven to be challenging as many NHS organisations have/are undergoing re-structuring within the Trusts, as a result representation from various organisations have lacked. However, going forward, the network aims to hold a comprehensive list which will continue to build a professional partnership working [via on-line and meetings].
